

UTILITIES & OPERATIONS

MISSION

To reduce campus carbon emissions and the costs associated with maintaining campus operations by:

1. Adopting best practices in energy conservation through design, operation, and maintenance of both building-specific and district energy infrastructure.
2. Exploring and adopting best practices for campus energy procurement.

GOAL

Reduce Penn's building-related carbon emissions by 40% by 2024, using 2009 as the baseline year. Strategies include:

1. Investigating a renewable energy power purchase agreement, advancing enhanced recommissioning, and continuing proactive maintenance.

ACCOMPLISHMENTS

net reduction of building-related emissions in FY19 when compared to FY14.

reduction in net total campus emissions in FY19 when compared to FY14.

73,300 MMBTU is the estimated annual savings since FY14 from the five- and ten-year building recommissioning program.

FY09-FY19 | NET BUILDING-RELATED CARBON EMISSIONS
